This is a sample document to illustrate how to insert image in a LaTeX document. In this document we will illustrate different image insertion techniques.

1.1 Single Image

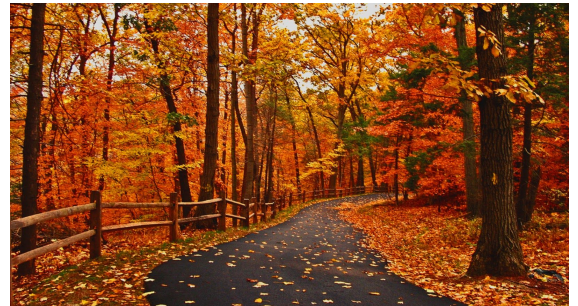

Figure 1: Beautiful Picture of Water Body

1.2 Sub-Image

Now in below we will show how to use subfigure. For this purpose we are using float(subfloat). Subfloat is very useful for placing subfigures at any desired position.

(a) Rural Picture

(b) Urban Picture

(c) Beautiful Sunset

Figure 2: Two different pictures of road and beautiful sunset

This is to check wheather the references are working or not. My first reference is [1]. The second one is [2] and so on.

Remember if you do not refer a particular entry in your bibliography it will not be shown in reference.

There are many bibliography styles present to use and you can use any one of them. You can find them in online.
